3rd August 2017

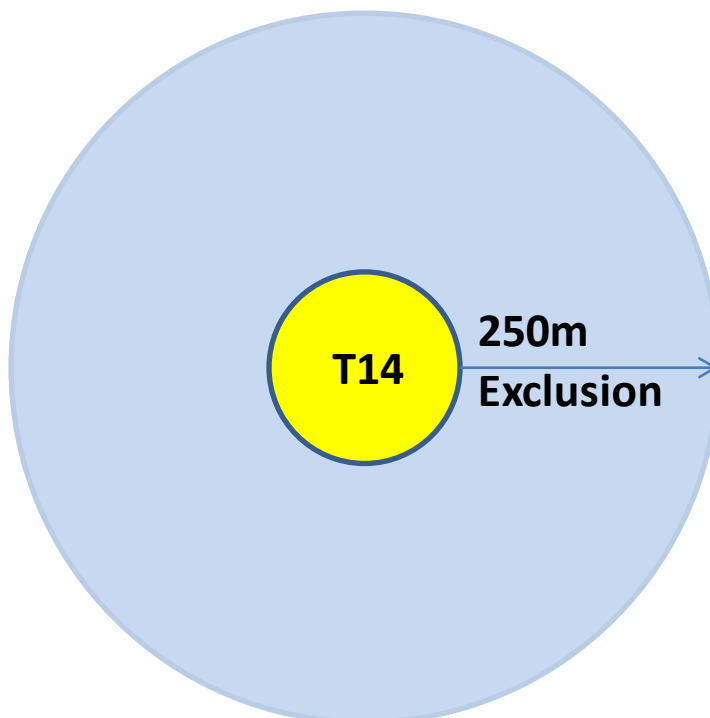

Teesside Offshore Wind Farm

Important Notice to All Marine Users

Gearbox exchange on wind turbine 14 with assistance of a jack-up vessel

A Gearbox exchange is planned to commence within the boundaries of Teesside offshore windfarm on turbine 14 with the assistance of the Wind Server jack-up vessel. The works will involve removal of the existing gearbox and installation of a new one. Anticipated duration of work at the turbine will take 4-5 days, depending on the turbine status and weather conditions. We plan for the works to commence on the 15th August 2017 but we will issue a further notice nearer the time with exact confirmation of the date.

For safety reasons there will be a 250m exclusion zone around the radius of turbine 14 as shown below.
