

# NOTICE TO MARINERS

## North Sea – Central and Southern

May – July 2018

Figure. 1: Wave Glider

The instrument (ca. 3m long x 0.6m wide) travels slowly on the surface under wave power. It is fitted with an orange flag, all-round white light and Radar Target Enhancer.

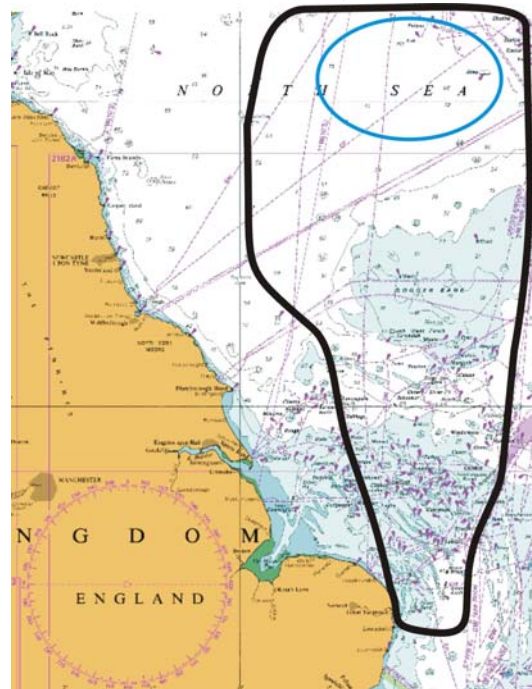

**If discovered before 15<sup>th</sup> July 2018, please leave in the water.**

The instruments are the property of the Cefas and deployed from the *RV Cefas Endeavour*.

A Wave Glider for oceanographic research will be operating in UK waters in the Central and Southern North Sea between the UK coast and the UK/Netherlands border.

**Approximate north extent  
56°40'N  
Approximate south extent  
52° 25'N**

Fig. 2: Approximate Wave Glider operations area, mainly within the area shown by the blue ellipse centred on 56.2N, 002.0E.
