### 1. INTRODUCTION

Mariners are advised that Hornsea Project One will be commencing sandwave clearance works along the offshore export cable corridor and interlink corridor. Hornsea Project One Offshore Wind Farm is located within the UK Sector of the North Sea off the coast of East Yorkshire. Sandwave clearance works will commence on or about **5 March 2018**.

### 2. SAFETY

It is requested that anybody having knowledge of any potential objects submerged or moored on the seabed, within the area or operations, that could be damaged or form a hazard to the sandwave clearance vessel and its equipment, advises the Projects Fishing Industry Liaison of their position and nature.

When works commence a listening watch will be maintained on VHF Channel 12 and 16 when within the appropriate port authority area, and will actively transmit an AIS signal. The vessel will also broadcast at regular daily intervals, vessel position, operational information and intentions.

Doc. no.      2898189  
Case no.      200-12-0456

The vessel will be deployed to offshore locations within the export cable corridor, interlink cable corridor and HU209 and HU210 disposal areas at times and positions determined by client requirements, weather and sea conditions.

The operations will commence on or about the **5 March 2018**. The exact finish date is dependent on the prevailing weather conditions, vessel downtime and work progress.

The vessel will be deploying dredging equipment and this will restrict its ability to manoeuvre. It will be requested that all vessels operating within the area keep a safe distance (500m) and pass at minimum speed to reduce vessel wash.

Please be advised that **Tideway** will be carrying out the operations with the **MV Uilenspiegel**.

Operations will be conducted on a 24 hour basis. Throughout operations the vessels will be displaying the shapes and lights prescribed in the International Rules for the Prevention of Collisions at Sea (COLREGS) Rule 27. Displaying the prescribed shapes and lights when the vessel is restricted in its ability to manoeuvre.
