## 2. The UK main ports supporting current operations

Grimsby - Crew Transfer Vessels (CTV), light logistics (personnel, tools and equipment) & main vessel port logistics

## 3. Safety Information

All vessels not involved in construction activities are requested to keep 500m distance from construction and dive vessels whilst transiting the area

All vessels should proceed with caution whilst navigating and/or working in the area and be aware of the statutory 50m safety zone around each fixed asset.

**The Self-Propelled Jack Up Barge (JUB) GMS Endeavour is jacked up at Z13 and requires a 500m exclusion zone. The GMS Endeavour will be moving to other locations within the field this week. The Self-Propelled Jack Up Barge (JUB) GMS Evolution is jacked up at Z01 and requires a 500m exclusion zone.**

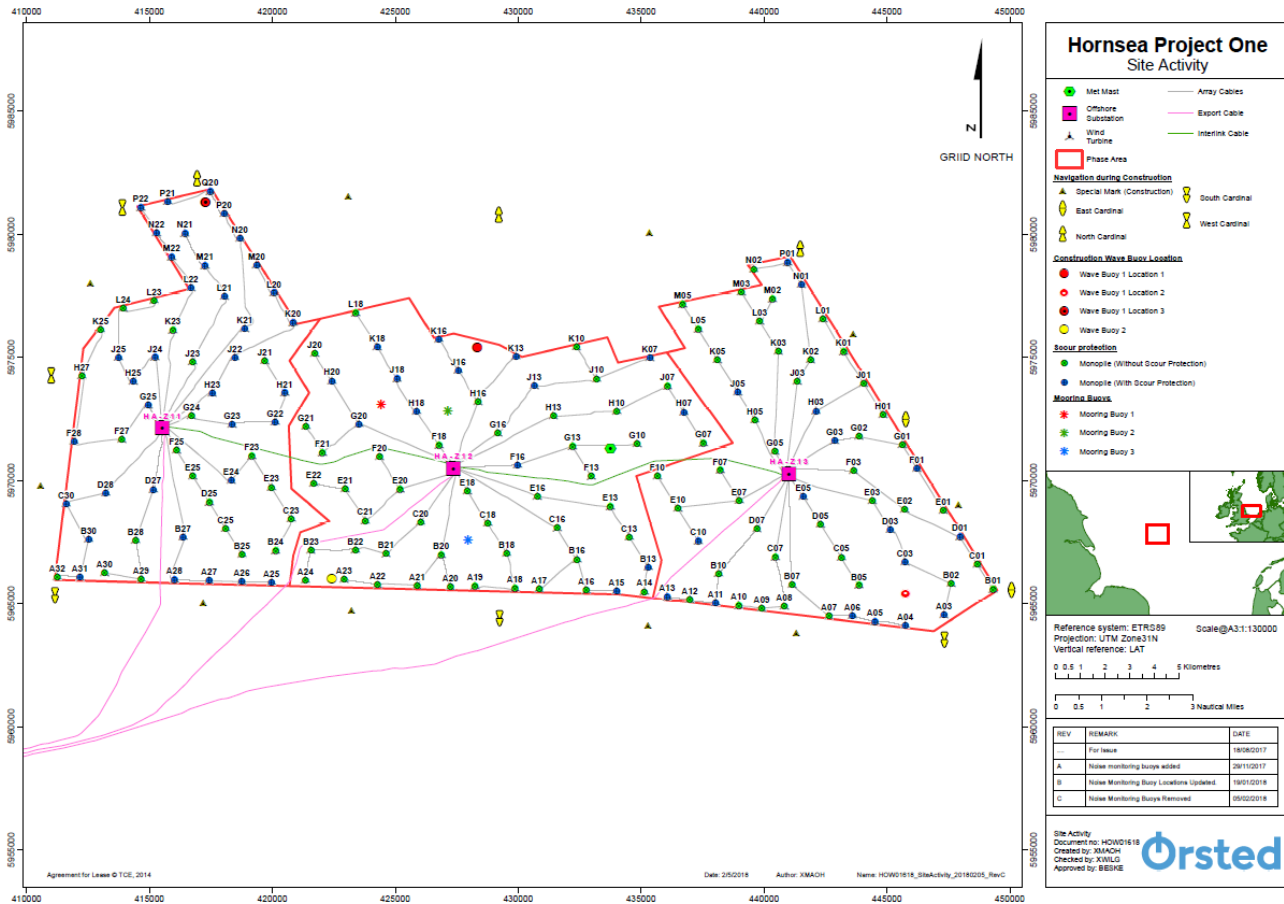

**The Trinity house vessel “Galatea” has attended site and removed the cardinal buoys around the RCS site.**

**The Installation vessels “Sea Challenger” and “Bold Tern” are now on site and installing WTG’s in the central sector.**

Discrepancies identified between coordinates should be questioned immediately to Ørsted. Information is supplied on a ‘not for navigation’ basis. All coordinates are WGS84 unless otherwise stated.

### 4. Deployed navigation aids and buoys

The offshore site boundary for HOW01 is shown as below and will be marked by standard IALA navigation marks. All buoys have been deployed as per below tables.

## 7. Notice to Mariners updates

Below is a list of the current Notice to Mariners;

Date	Subject	Updates
15/09/2017	Export Cable Trenching Works – Tideway Offshore (Lange Wapper)	Vessels work for next 7 days per below map.
07/09/2017	Export Cable Boulder Clearance Works	Vessels work for next 7 days per below map.
20/10/2017	Hornsea One UXO Detonation, Update 8.	UXO detonation delayed due to weather
03/11/2017	Met mast Works	None
17/11/2017	offshore boulder clearance works in the offshore wind farm area	
17/11/2017	offshore installation works in the offshore Wind Farm area with the installation of scour protection and foundations.	
04/12/2017	Deployment of Acoustic Waves and Current (AWAC) Profiler	
04/12/2017	Deployment of Noise Monitoring Equipment	Revision C- updated coordinates
26/01/2018	Export Cable and Interconnector Boulder Clearance	Update 4 issued 27/02/18
13/02/2018	Export Cable Rock Placement	
24/02/2018	TP Installation – Sea Installer	
01/03/2018	Export Cable Soundwave Clearance	
02/03/2018	Pre- lay Works for Crossing Third Party Cables/Pipelines	
13/03/2018	Export Cable and Interlink Cable Laying Works	
23/03/2018	Commencement of Jack Up Accommodation platform operations	
27/03/2018	Intertidal and Nearshore Export Cable Works	
06/04/2018	Offshore Substation Installation	
03/05/2018	Transition Piece bolt tightening vessel – Eurus Express	
17/05/2018	Status of Confirmed Unexploded Ordnance	
29/05/2018	Array Cables Installation	
05/06/2018	Array Cables Boulder Clearance	
12/06/2018	OSS installation update	
14/06/2018	UXO detonation - Update	
29/06/2018	UXO Detonation - Complete	
27/07/2018	Offshore Substation Topside Installation – Z11 & Z13	
27/07/2018	Monopile and Transition Piece Installation Update - Innovation return to field	
23/08/2018	HOW01 NtM – Export Cable and Interlink Cable Installation Update (Vessel: Living Stone)	
31/08/2018	Transition piece installation - update	
31/08/2018	Intertidal and Nearshore Export Cable Works	
19/09/2018	Diving Met Mast Removal Preparation Campaign	

31/10/2018	Post lay rock placement r1	
09/11/2018	Notus Express TP bolt tightening vessel	
13/11/2018	UXO Detonation	
27/11/2018	Offshore Export Cable Burial – ETD Hercules	
04/01/2019	Decommissioning of Anemometry Mast	
25/01/2019	WTG Installation – Vessel Sea Challenger	
25/01/2019	WTG Installation – Bold Tern	

## 8. Safety Zones

The Secretary of State for the United Kingdom has declared safety zones under the following terms:

### During Construction

1. 500 metres radius around each installation of wind turbine, collector substations and/or their substructures and foundations comprising the Hornsea One Offshore Wind Farm whilst work is being performed as indicated by the presence of construction vessels including jack ups.
2. 50 metres radius around each wind turbine, collector substations and/or their substructures and foundations installed but waiting to be commissioned as part of the Hornsea One Offshore Wind Farm. All fixed structures, including partially constructed structures such as turbine foundations, will be mounted and marked with a Flashing Yellow 2.5s light visible through 360 degrees with a 2nm range.

The table below indicates the Safety Zones that are active.

Asset	Size	Duration
Z13	500m	During the presence of the GMS Endeavour
Z01	500m	During the presence of the GMS Evolution
All locations	500m	During the presence of the Wind Innovation
All locations	500m	During the presence of the Edda Mistral
All locations	500m	During the presence of the Deep Cygnus
All locations	500m	During the presence of the Bold Tern
All locations	500m	During the presence of the Sea Challenger
