2 The UK main ports supporting current operations

Grimsby – Crew Transfer Vessels (CTV), light logistics (personnel, tools and equipment) & main vessel port logistics

3 Safety Information

All vessels not involved in construction activities are requested to keep 500m distance from construction and dive vessels whilst transiting the area

All vessels should proceed with caution whilst navigating and/or working in the area and be aware of the statutory 50m safety zone around each fixed asset.

Increased helicopter activity is expected as hoisting to WTGs begins.

Discrepancies identified between coordinates should be questioned immediately to Ørsted. Information is supplied on a 'not for navigation' basis. All coordinates are WGS84 unless otherwise stated.

4 Deployed navigation aids and buoys

The offshore site boundary for HOW01 is shown as below and will be marked by standard IALA navigation marks. All buoys have been deployed as per below tables.

8 Safety Zones

The Secretary of State for the United Kingdom has declared safety zones under the following terms:

During Construction

1. 500 metres radius around each installation of wind turbine, collector substations and/or their substructures and foundations comprising the Hornsea One Offshore Wind Farm whilst work is being performed as indicated by the presence of construction vessels including jack ups.
2. 50 metres radius around each wind turbine, collector substations and/or their substructures and foundations installed but waiting to be commissioned as part of the Hornsea One Offshore Wind Farm. All fixed structures, including partially constructed structures such as turbine foundations, will be mounted and marked with a Flashing Yellow 2.5s light visible through 360 degrees with a 2nm range.

The table below indicates the Safety Zones that are active.

Asset	Size	Duration
All locations	500m	During the presence of the Edda Mistral
All locations	500m	During the presence of the Deep Cygnus
All locations	500m	During the presence of the Edda Fjord
